

Bayou Perma-Pipe Canada, Ltd.

Premier pipe coating and insulation services

We're pleased to introduce Bayou Perma-Pipe Canada, Ltd. (BPPC), located in Camrose, Alberta.

BPPC, a joint venture between The Bayou Companies and Perma-Pipe, Inc. was formed in November 2009 when the company acquired Garneau Inc.'s Camrose pipe coating and insulating assets. Since the acquisition, significant investments have been made in the plant, yard and personnel at the Camrose facility with overall improvements in safety, quality and efficiencies. By combining experienced operations and sales staff in Alberta with the technical and operational depth of its parent companies, BPPC is set up to service the pipe coating and insulating needs of the Canadian market.

Owned by Bayou and Perma-Pipe, BPPC operates the Camrose coating facility

With the addition of the Perma-Pipe expansion, the plant has grown from 65,000 to 105,000 square feet. The 65,000 square foot coating facility in Camrose houses two coating lines capable of handling 2-inch to 60-inch diameter pipe lines, as well as an insulation line to provide above-ground insulation solutions. With over 100 acres of storage space available and access to a CN Rail Spur, BPPC can handle our customer's small and large-diameter project requirements.

Investments have been made to upgrade the plant's pipe cleaning, powder application and general processing capabilities. New equipment has been installed to supply above-ground insulation solutions. These and future planned investments will provide increased efficiency, product quality and safety for the Camrose operation as well as new insulation product offerings for our customers.

BPPC™ currently provides the following products:

- Fusion Bond Epoxy, Ultra FBE
- Dual Powder Abrasion Resistant FBE, Ultra FBE Abrasion
- Dual Powder High Temp FBE, Ultra Nap-Gard® Gold
- Two Layer Polyethylene Coatings, Ultrabond RA
- Three Layer Polyethylene Coatings, Ultrabond IIISE
- Polyurethane Foam Insulation, Ultrafoam TA & Xtru-Therm®
- Above-Ground Insulation Systems, Hi-Gard®
- Application of Heat Tracing and Leak Detection for Insulated Pipe

BPPC has the ability to add the following products and service in the future:

- ID pipe linings
- Double jointing services
- Concrete weight coatings
- Additional storage capacity

About Bayou

The Bayou Companies with nearly 70 years experience in the pipeline industry, has three coating facilities located in Louisiana. Bayou is a leading provider of cost-effective solutions to onshore and offshore energy and infrastructure companies primarily located in North America and the Gulf of Mexico. Bayou's products and services include internal and external pipeline coating, weighting, insulation, custom coating and double-joint welding services. Bayou also provides specialty fabrication and services for offshore deepwater installations, including project management and logistics.

Bayou was acquired by Insituform Technologies, Inc. in February 2009. Insituform's Energy & Mining platform, which includes Bayou, Corpro, Inc. and United Pipeline Systems, protects and extends the lifecycle of pipelines and other structures.
